

# E46L DOUBLE CAMERA

## MICRO TOOLING AS NEVER SEEN BEFORE

E46L and E46LA presetters can be equipped with a second camera with 90X magnification to measure, inspect and certify micro tools.

Thanks to their high precision and accurate measurements, the E46L and E46LA double-camera systems are used for industries such as watch-making and medical component manufacture.

Unique, intuitive and easy to use, the micro-tool measuring operation is made simple and reliable.

## DOUBLE CAMERA, SAME RESULT

The first camera allows measurement and inspection of tools with 26X magnification, and the possibility of 2X and 4X digital zoom.

Maximum tool diameter measurable:  
210 mm

The second camera provides a 90X magnification, ensuring very small diameter tooling can be accurately visualized.

Maximum tool diameter measurable:  
120 mm  
Extremely precise measurements,  
always.

**UNIQUE. INTUITIVE. RELIABLE.**
