

E68LA

WITH JUST A SIMPLE CLICK OUR MACHINE SOFTWARE IS ALWAYS ON HAND TO HELP

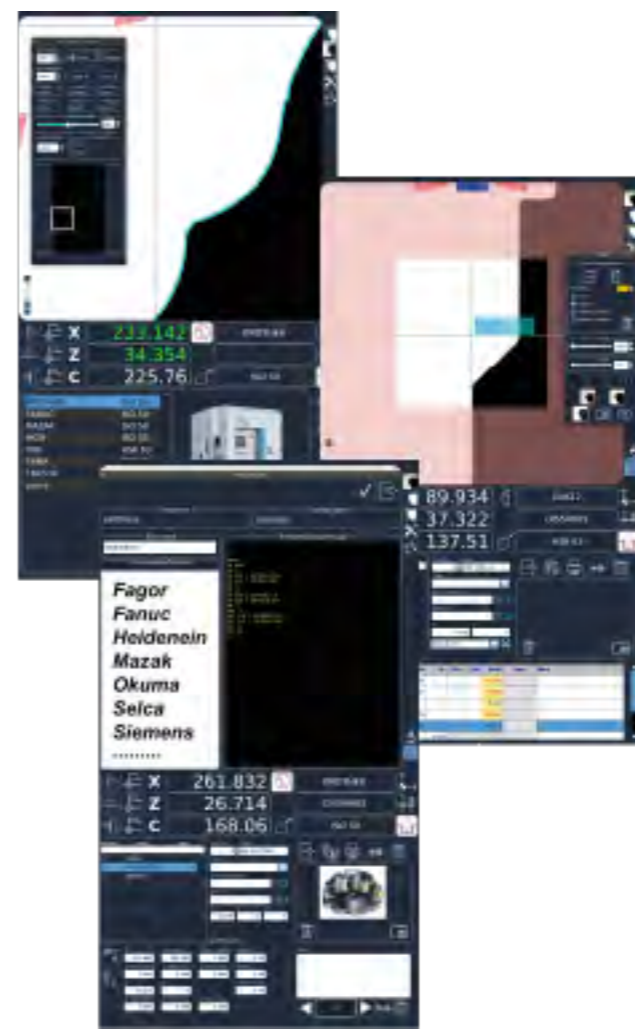

There is no easier way to create a DXF: frame the tool, acquire the profile and export it.

E68L series allows you to import a DXF file to overlap on it on the tool profile.

All the information you need in the right place at the right moment. Internal/external angles, radii, heights, diameters.

Limits are made to be overcome and with the post-processors universal generator, no obstacle will be insurmountable.

The program transmission is instantaneous without zero errors. More than 50 post-pro are included.

“ANY SUFFICIENTLY ADVANCED TECHNOLOGY IS INDISTINGUISHABLE FROM MAGIC” ARTHUR C. CLARKE

Why complicate your life when the solution is simple and uncompromising?

AUTOFOCUS function: by clicking on “AUTO” button, the spindle makes a 360° rotation and the software analyzes all the cutting edges.

The rotation spindle peripheral speed is calculated based on the tool diameter.

AUTOMATIC. STABLE. VERSATILE.
